Risk management: decisions you control.

Apply configurable risk rules to every transaction. Dinape calculates a clear risk score and automatically approves or blocks payments against your thresholds.
Reduce manual reviews, identify risks faster and make consistent decisions at scale – while keeping every decision transparent and under your control.

01 WHO IT BENEFITS

Sales & Business Development

Use predefined rules and structured configuration to increase secure revenue.

Risk & Fraud Teams

Apply consistent risk controls and explain decisions with clear score contributions.

Payment Operations

Investigate faster with risk scores and clear transaction decision context.

02 HOW IT WORKS

Configure

Set risk rules and thresholds at client, division or merchant level.

Execute

Automatically evaluate every transaction against your active risk rules.

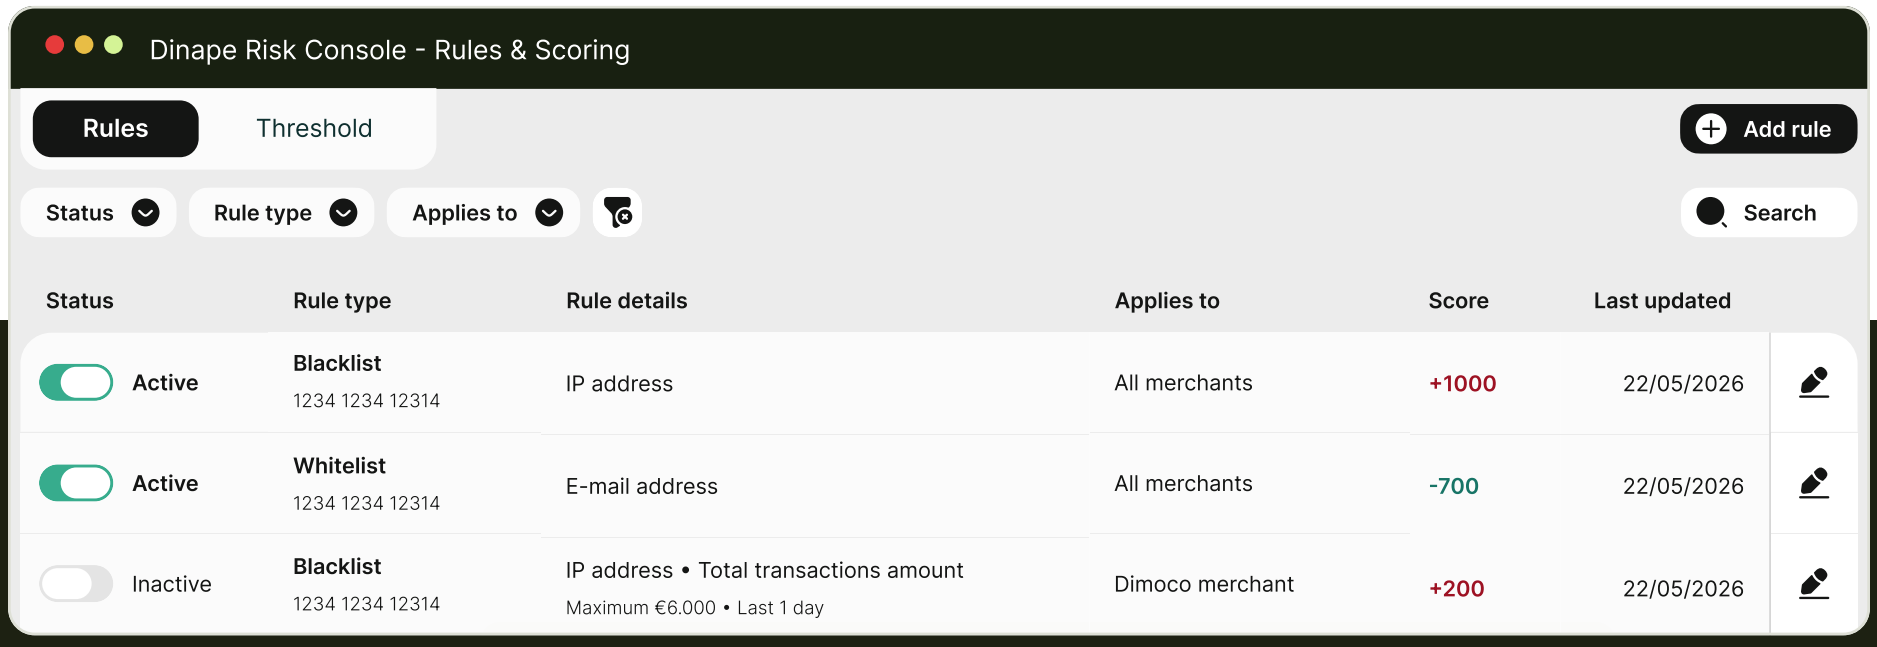

Analyze

Understand risk scores, rule contributions and the reasons behind each decision.

Optimize

Refine rules and thresholds to improve risk controls over time.

03 WHAT YOU SEE

Payment Orchestration - Built in Europe. Ready for the World.

Dinape is a european-based Payment Orchestration Platform that helps clients simplify complex payment operations and take control of their entire payment ecosystem.
